

Woodland Owl

3-D Style Valentine

Be sure to have an adult help you with this craft. Using small, sharp scissors, cut out the three heart shapes and strips carefully. Cut the strips into six separate sections along the dotted lines. Accordion pleat the thin strips. (See drawing below.)

Starting with the bottom heart, glue three pleated strips inside the edge- equally spaced around the heart. Make sure the pleated strips will be under the next smaller-sized heart. Let the strips dry. (Two-sided tape can also be used to attach the pleated strips,)

Next, dab some glue on the top of each strip and attach the medium-sized heart. Allow this to dry.

Finally, glue two or three strips to the back of the smallest heart. Allow to dry and then glue this top heart to the medium-sized heart, centering it as you do.

Have fun and try out your own ideas using accordion-pleated strips to make more raised 3-D style Valentines!
